

KRÜSS launches partnership with the University of Chicago

The cooperation between the *James Franck Institute* and KRÜSS spurs the development of additional research opportunities for both academia and industry.

- KRÜSS provides surface science instrumentation to further academic excellence at the University of Chicago
- The university acts as a major hub for surface science research

Charlotte, November 17, 2017 – In June of 2017, KRÜSS and the University of Chicago worked together to develop a partnership to further cutting-edge research opportunities in the Chicago area. As a result of this collaboration, the *James Franck Institute* has dedicated the *KRÜSS Surface Science Laboratory*, which will house high-end [tensiometers](#) and [contact angle measurement](#) instrumentation. The new co-operation extends the scientific network of the company, which already maintains partnerships with other esteemed universities throughout North America, such as UCLA, Stanford, Rice University and the University of Alberta.

This cooperation will enhance both undergraduate and graduate research studies by putting the most advanced tools into talented hands to train the scientists of tomorrow. Additionally, this opportunity allows for industry professionals to interact with the university and KRÜSS in new ways.

Following an initial event on November 9, KRÜSS will also be hosting Surface Chemistry Seminars at the dedicated laboratory. These seminars will cover the fundamentals and practical applications for surface science in industry and academia. Information about seminar dates at different location can be found on the company's website: www.kruss-scientific.com/seminars

About KRÜSS

Advancing your Surface Science. As specialists in interfacial chemistry and the world's leading supplier of measuring instruments for surface and interfacial tension, we not only provide high quality product solutions – our offer is a combination of technology and scientific consulting. These include seminars and technical service as well as our Applications & Science Center for trainings and professional measurement services. Our exclusive distribution network and our locations in Hamburg (Germany), the US, China, Great Britain, and France allow us to provide fast, flexible support for R&D labs and in quality control throughout the world. Our expertise, precision and passion have already convinced many prestigious companies in countless industries.
